Assessment Instructions:

1. **Create an HTML Table**

   o Use the <table> tag to define the table structure.

   o Include at least **5 employees** with their details.

2. **Include a Header Row**

   o The first row of the table should be a **header row** (<th>) containing column titles:

      ▪ **Name**

      ▪ **Position**

      ▪ **Department**

      ▪ **Contact** (Phone or Email)

3. **Add Employee Data**

   o Use <td> (table data) to input sample employee details.

   o Ensure the content is structured properly.

4. **Apply Table Formatting (Optional, but Recommended)**

   o Use **CSS** to style the table for better readability.

   o Apply **border, background color, padding, and alignment**.

   o Use **alternating row colors** to enhance clarity.
